DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24 and 32-51, drawn to a tablet-cutting apparatus, classified in class 83, subclass 425.
 - II. Claims 25-31 and 37-43, drawn to a method of cutting a table into two portions, classified in class 83, subclass 13.
2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the claimed process can be practiced by a different apparatus. For example, the cutting step is performed by a cutter in which the cutter partially cut the tablet and the partially cut tablet is further broken in half by a roller.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
3. If Applicant elects group I, Applicant is further required to elect one of the following patentably distinct species:

Species A: the tablet-cutting device in Figs. 1-14, claims 1, 2, 4, 5, 8, 10-12, 16, 22, 22, 24, 32, 44, 45 and 47-51.

Art Unit: 3724

Species B: the tablet-cutting device in Figs. 15-23, claims 1-5, 8, 10-24, 32-34 and 44-51.

Species C: the tablet-cutting device in Fig. 24, claims 1, 2, 4, 5, 6, 8, 10, 11, 32, 35, 44, 45 and 47-51.

Species D: the tablet-cutting device in Fig. 25, claims 1, 2, 4, 5, 7, 8, 10, 11, 12, 13, 32, 36, 44, 45, 47-51.

The species are independent or distinct because each of them has distinct technical features. For example, each species has a distinct alignment member as shown in Figs. 8, 17, 24 and 25.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 12, 32 and 44 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
